1. Have you encountered such a problem?

The GPS has no more power when driving

The phone has no electricity when driving

The iPad / iPhod has no power when listening to a song

Who could solve this on crucial moment ?

The TripleBooster Car-Charger could help you.

Input : From 8V to 24V - Will work perfectly on small cars, as well as on large trucks

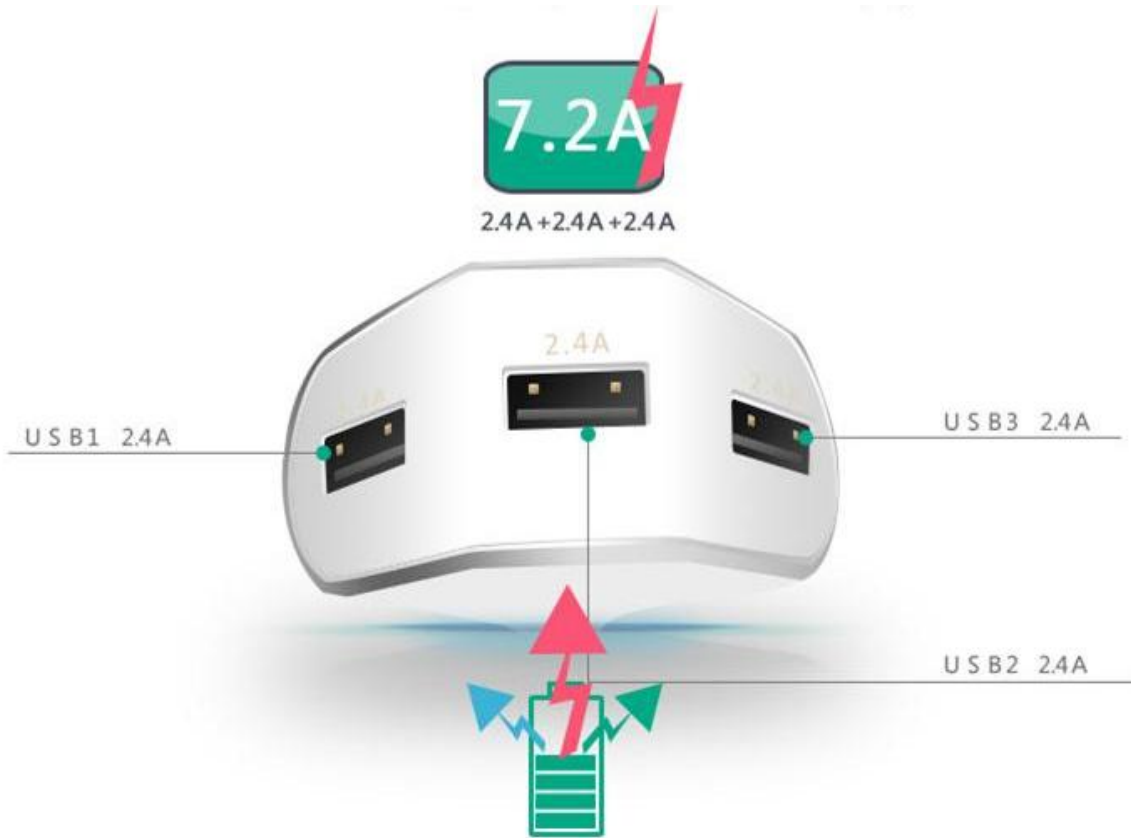

2. Intelligent Technology

Each USB port processes a smart sense chip that detects the device that is plugged in. Then it provide the max. output allowed for that device, for full charging speed.

3. High Power Capacity

3 USB ports, each has it's own microchip that detects the device plugged into through USB PIN signals, in order to provide output at full power and full charging speed.

4. Three independent USB ports

With up to 7.2A current output, the charger is capable of simultaneously charging three large tablets at the same time, at maximum speed.

5. Multi - Protection

Intelligent circuit design protects against Over-heated, Over-Current, & Over-Charging.

Over charge protection
Over current protection
Short circuit prevention

6. Compatible with a large variety of devices

Smartphones & Tablets:

Apple iPhone 6S, 6S+, 6, 5S, 5C, 5, iPad Pro, Air, Mini, iPod,
Samsung Galaxy s6, Edge, s^, S5, S4, S3, Note 4, 3, 2, Kindle(Fire), Tab,
HTC One, M9, M8, LG 4, 3, 2, Optimus F3, Nexus 5, 6, 7, 9, 10,
Motorola Droid RAZR MAXX, Blackberry, Etc.

Others:

External Battery GPS, PSP, Bluetooth speaker / headset MP3 & USB powered device, etc.

7. High-Quality Fire-Proof material

The TripleBooster Car-Charger is made of a V-0 Level Fire-Proof, Durable material. No radio loss in your car, or effect to Bluetooth or WiFi devices.

8. High-Quality aluminum alloy material

The TripleBooster Car-Charger contacts are made of a High-Quality & Durable aluminum alloy material.

9. Three led indicators - One for each USB port

The TripleBooster Car-Charger contains three built-in led indicators.

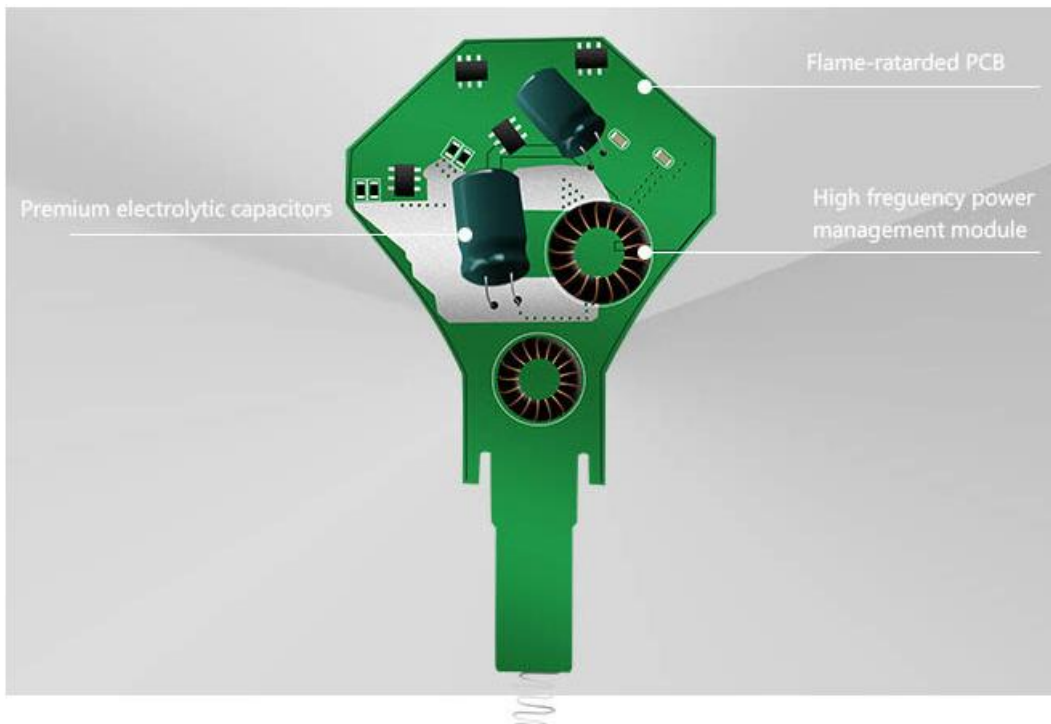

- Each led indicator is dedicated to a single port.
- When charging, the led indicator is lit with a soft blue light, so it won't distract you while driving .
- The led indicator turns off when charging stops, for example:
 - When No device is connected.
 - When the battery is full.
 - No supply / connection.
 - Short on the specific USB cable.

Please note - The indicator does NOT shows Connectivity - It shows USB port STATUS

10. PCB (Printed Circuit Board) Structure

The TripleBooster Car-Charger PCB is also made of a Fire-Resistant material. The pictures bellow describe the main circuits on the PCB.

11. How to contact Krispin-Electronics / TripleBooster

For any question or request, our support team is available around the clock.

You can contact us in the following ways :

- Use the QR-Code in your welcome-card, and insert your mail info, and stay updated.
- Type in your browser the address <http://triplebooster.com/bonus>, and stay updated.
- Type in your browser the address <http://triplebooster.com>, and share your thoughts.
- Type in your browser the address <http://krispinelectronics.com>, and share your thoughts.

From time to time, we will initiate sales & promotion discounts.

Any person who bought an item from krispinElectronics, and left an honest review is entitled to participate in those promotions.

All you have to do is :

- Contact us via one of the ways detailed above.
- Leave us your buyer name and date, and your review date.

This will insert you into the contest immediately.

The more items & reviews - The higher the stakes.
